BREE, CHARLES CAULDER

**Examiner**

DANIEL V. VENNE

**Art Unit**

3617

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### **DETAILED ACTION**

1. An amendment was received from applicant on 6/11/2008.
2. Claims 1, 2, 4, 6 and 7 are amended.
3. Claims 3 and 5 are canceled.
4. Claim 9 is new.

### ***Specification***

5. A substitute specification excluding the claims is required pursuant to 37 CFR 1.125(a) due to the extent of editorial changes to the amended specification.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

6. Although technically the MPEP does not support an objection to British English spellings in a specification, the application is a U.S. filing for which English is required, and American English for a U.S. filing would be expected for a U.S. filing; therefore, it is

not unreasonable to request that all British English spellings be replaced with American English spellings in order to adequately search and examine the application. In view of the foregoing, applicant's assistance is requested to replace all British English spellings with American English spellings throughout the disclosure (specification and claims) in order to correspond with the correct American English spelling for the U.S. filing of applicant's application and provide corresponding American English spellings for an adequate search and examination. Applicant's assistance is also requested to correct any and all typographical and punctuation errors which still remain in the application.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1, 2, 4 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lekhtman (US 2004/0028478 A1). Lekhtman discloses an assembly of moldings that can be joined together to form a floating structure (modular dock) - a modular dock can also be considered a boat which can be considered a floating craft. The assembly comprises multiple (at least first, second, third and fourth moldings) each produced by a rotational molding (roto-moulded) and having a hexagonal outer profile incorporating a plurality of joining portions [1] with flat (planar) outer faces and planar joining portions, configured as generally claimed by applicant. The moldings are made of polyethylene plastic. Planar joining portions (faces at [9]) can be joined face to face to each other in

at least two different positions. Adjacent planar joining portions are disposed at a 120 degree angle to one another.

***Response to Arguments***

9. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
